Welcome address

India ranks among the world's fastest growing and most dynamic regions and represents a key export market in the Southeast Asia region for companies from Hessen, Germany's leading economic region. India imported machinery valued at €20 billion in 2015. Germany is one of the most important countries exporting this machinery to India.

The Indian Metal-Cutting Machine Tool Exhibition is the largest exhibition of metal-cutting machine tools and manufacturing solutions in South and Southeast Asia. I am very pleased to announce that the German state of Hessen will be participating in IMTEX for the fifth time in 2017.

With Hessen's joint pavilion, the Hessen state government will support six Hessen based enterprises with their broad product ranges and will showcase the comprehensive range of innovations and technological refinements in the extensive product segment of metal-cutting machine tools. The participants from Hessen will be able to take advantage of the many business opportunities offered by India's high-growth market, which will enable them to later establish permanent operations in the region.

For Indian companies, Hessen represents an ideal gateway to the German and European markets. Its central location, excellent infrastructure, and highly robust economy make Hessen one of the most dynamic regions in Europe.

You can learn more at the Hessen Pavilion about the state of Hessen and its innovative companies in the metal-cutting machine tools and manufacturing solutions sector. The teams of Hessen Trade & Invest GmbH and the Frankfurt Chamber of Industry & Commerce will afford you all the attention and support you require.

I hope the Hessen Pavilion is well visited and that the Hessen based exhibitors are able to engage in productive conversation and make valuable business contacts.

Dr. Rainer Waldschmidt
